

STUDENT INTERNET USE

The Board of Education recognizes that technology is a tool for instruction which should facilitate and enhance the curricular goals of the District. Internet access is one of the technology tools that can provide positive learning experiences for students.

Because of the unique nature of Internet, the staff will provide guidance and instruction to students in the appropriate use of that resource. Those responsible for student Internet access will monitor its use so that maximum instructional benefit will result.

Students are responsible for good behavior on school computer networks just as they are in a classroom or a school hallway. General school rules for behavior and communications apply.
