The Oakhill Story

Oakhill Elementary School is the latest addition to Elgin Community School District No. 46. Its doors opened to Streamwood area students less than two and one-half years after the dedication of Streamwood Elementary School and is the fourth public elementary school now serving the community.

Completed in just five months, Oakhill Elementary School welcomed its first classes in February of 1965. It is a three section, two level school with 20 classrooms, including two exceptionally large kindergarten rooms.

Meeting completely the new Illinois School Fire Safety Code, Oakhill is unique in District U-46 and one of the few schools in the state that has satisfied all the code's requirements.

Other features include the natural wooded site with building adjusted to site contours, the compact building with minimum exterior wall footage, the large multipurpose room that is used every hour of the day, and separated toilet facilities for lower grades and upper grades.

Also very useful are the special storage area for district use, the teachers' room with adjoining workroom, the health and music-speech offices, as well as the conference, counsel, and waiting rooms conveniently near the administrative offices.

The school has 56,676 square feet of useful space and a total cost of \$621,560, including walks and drives, architect's fees and the movable equipment budget. Final landscaping is scheduled to begin after school is dismissed for the 1965 summer vacation.
