

Behavioral and Mental Health Resources-Kane County

	<p>"211 works a bit like 911. Calls to 211 are routed by the local telephone company to a local or regional calling center. The 211 center's referral specialists receive requests from callers, access databases of resources available from private and public health and human service agencies, match the callers' needs to available resources, and link or refer them directly to an agency or organization that can help."</p>
