# Clever

Teacher portal

How teachers can make the most out of Clever

Clever makes it easy for students to access all of their learning software, files, and resources in the classroom.

Clever helps students instantly log in to all of their online resources, and all in one place. We also partner with your district to automatically create and update your students' accounts in their learning applications so you don't have to.

You have a personal Clever Portal set up for you to manage your classes. Within your teacher portal, you can:

1 See which students are logged in to Clever to help identify those who are having trouble logging in.

**2** Launch an application for all students logged in to Clever.

3 Log an entire class out of Clever—all with a single click.

4 Download Clever Badges for your class—or an individual student—so students can log in easily.

5 Help students quickly log in if they're having trouble—no need to go to the school or district tech admins for support.

Click the "Applications" tab

New for teachers: Teacher pages

You can create your own unique teacher page with custom links and resources you want your students to use.
