| Standard | 4 - Mastery | 3 - Proficient | 2 - Basic | 1- Below Basic | 0 - No Evidence |
| :---: | :---: | :---: | :---: | :---: | :---: |
| CA-A1-A Understand the concept of a function and use function notation. | A. Apply composite function properties in an authentic task. <br> AND <br> A. Explain why an authentic task does not represent a function with explicit examples. | A. Use function notation to model a function from an authentic task. AND <br> A. Explain why an authentic task represents a function with explicit examples. | A. Write the relationship in words, as expression, or an equation not using function notation. AND <br> A. Explain why an authentic task represents a function without explicit examples. | A. Recognize $x$ is the independent variable and $f(x)$ is the dependent variable. AND <br> A. Determine if a relation is a function. | A. Not yet able to understand a function or use function notation. |
| CA-A1-B Interpret the dependent and independent variables in the context of functions. | B. Describe the relationship the dependent and independent variables have within an authentic task. | B. Identify and interpret the independent and dependent variables within an authentic task. | B. Identify the independent and dependent variable within an authentic task. | B. Identify the independent or dependent variable within an authentic task. | B. Not yet able to determine the independent or dependent variables within an authentic task. |
| CA-A1-C Create and interpret expressions for functions in terms of the situations they model including selecting appropriate domains for these functions. | C. Find and correct errors of functions which represent an authentic task. Explain errors and corrections. Defend function if no error exists. | C. Write and interpret functions representing an authentic task including stating appropriate domain. | C. Write functions representing an authentic task. | C. Identify the parts of a function given for an authentic task. | C. Not yet able to write and explain a function from an authentic task which includes stating appropriate domain. |
| CA-A1-D Understand the relationship between a function and its graph. | D. Describe key parts of the graph and the corresponding parts (or process to find) making connections to the equation of a function. | D. Describe the type of relationship between a function and its graph within an authentic task. | D. Match a function to a graph. | D. Identify key features of a graph. | D. Not yet able to explain the relationship between a function and its graph. |
| CA-A1-E Find the domain, including implied domains, and the range of a function. | E. Explain and defend the implied domain of a function from an authentic task. | E. Find the domains, implied domains, and ranges of functions within an authentic task. | E. Find the domains, implied domains, and ranges of functions using equations. | E. Find the domain and range of functions graphically. | E. Not yet able to find the domains, implied domains, and ranges of functions. |
| CA-A1-F Analyze functions using different representations (verbal, graphic, numeric, algebraic). | F. Justify the most appropriate representations of functions and defend interpretations within an authentic task. | F. From various representations, analyze and interpret a function within an authentic task. | F. From various representations, analyze and interpret a function. | ```F. From one representation, analyze a function (verbally, graphically, or algebraically).``` | F. Not yet able to analyze functions using different representations within an authentic task. |
| CA-A2-RDF.S. Solve applications and create models involving radical equations. | S. Find and correct errors with radical equations which represent an authentic task. Explain errors and corrections. Justify process if no errors made. | S. Write a radical equation which represents an authentic task. <br> AND <br> S. Interpret solutions of radical equations from an authentic task. | S. Solve a given radical equation from an authentic task. | S. Identify independent and dependent variables of an authentic task. AND <br> S. Identify appropriate formulas needed. | S. Not yet able to write or interpret solutions of radical equations from an authentic task. |
| CA-A2-RDF-T Convert between radical and rational exponent notation. | T. Convert between rational exponents and radicals to simplify an expression. | T. Rewrite problems from an authentic task involving radical and rational exponents. | T. Rewrite problems involving radical and rational exponents. | T. Identify the index of a radical. | T. Not yet able to convert problems involving radical and rational exponents. |

Transition to STEM Unit Rubrics

| CA-A2-RDF-U <br> Simplify expressions involving radicals and rational exponents using appropriate exponent rules. | U. Find and correct errors when applying exponent rules to simplify radical, rational, and exponent expressions from an authentic task. Explain errors and corrections. Justify process if no error is made. | U. Apply exponent rules to simplify radical and rational exponent expressions from an authentic task. | U. Apply exponent rules to simplify radical and rational exponent expressions. | U. Use properties of exponents. <br> AND <br> U. Operate with fractions. <br> AND <br> U. Convert between radicals and rational exponents. | U. Not yet able to apply exponent rules to simplify radical and rational exponent expressions. |
| :---: | :---: | :---: | :---: | :---: | :---: |
| CA-A2-RDF.V. Solve equations involving radical expressions. <br> *Assume real numbers | V. Find and correct errors with solving radical equations from an authentic task. Explain errors and corrections. Justify process if no error is made. | V. Solve equations with radicals from an authentic task. Interpret solutions. | V. Solve equations with radicals. Identify extraneous solutions. | V. Recognize when the index is even, the radicand cannot be negative (over the real numbers). | V. Not yet able to solve an equation with radicals. |
