Course Welcome/Intro

In PLTW, students are exposed to a variety of topics including STEM, the design process, engineering, innovation and inventions and more. Students will work together in small groups to complete the design and modeling process of a product. This nine week course challenges students to use critical thinking skills to develop solutions and or innovations to everyday problems and products.

Required Course Materials

Composition Notebook (Will be kept in the PLTW Classroom)

Pens and Pencils

Classroom Expectations

- Integrity
- Failure Leads to Success
- Speaks With Good Purpose
- This is It!
- Commitment
- Ownership
- Flexibility
- Balance

Reassessment Policy

Projects will not be reassessed due to the cost of supplies and the limited time. However, paperwork and reflections on the project will be considered for reassessment. Students will have ten school days to complete reassessment.

Other Classroom Policies

Students are expected to fail and fix their mistakes.

Students are expected to work with others.

Supplies for projects are not meant to be used for toys.

Supplies need to be respected and used appropriately.
