

BLOOM

ACADEMY

AT SCHOOL DISTRICT U-46

Bloom Academy is an in-district program serving students (K-8) of School District U-46. We believe that social and emotional learning is as important as academic learning. Our goal is for students to carry a love of learning, as well as social and emotional skills, with them throughout their lives as they go on to experience positive outcomes and fulfilling futures.

We focus on fostering our students' social and emotional growth, enhancing their natural strengths, and increasing their academic and behavioral competencies. The Bloom Academy team values partnerships with parents. This means working together to assist each student with developing social-emotional, interpersonal, self-management and decision-making skills. The goal of the program is to prepare students for success when they return to their regular schools.

Students are identified for short-term placement in the program by the district Tactical Assessment Team (TAT). Parents are an important part of making this decision in collaboration with school and district-level teams.

Bloom Academy partners with School District U-46 to provide an effective alternative for students to explore their full potential and achieve their full capabilities.

School Overview

- Part of the U-46 School Community
