

Biology Pandemic Power Point Project

Complete a power point with one page for each of the topics listed below

Title Page- 1918 Flu pandemic (at least 3 pictures).

Describe the cause and when the 1918 Flu started and ended.

Describe the different locations where 1918 Flu was said to have started.

Describe how life changed for United States residents during the 1918 flu.

List at least 5 Pandemics that have taken place in the last 1000 years.
Include dates, location, cause of pandemic, and how many people were lost.

Compare 1918 Flu with Covid-19.

A side note about the 1918 Spanish Flu pandemic. My Grandfather, Lawrence E. Houle was a high school student in Kewanee Illinois during the 1918 Spanish Flu. He graduated in 1920. His high School did not have a year book in 1920, 1919 or 1918. He only appeared in the 1917 Kewanee High School yearbook in the Freshman Picture. In those days only Seniors and faculty took individual pictures for the yearbook. Freshman, Sophomores and Juniors were only in the yearbook in a group picture. His name did not appear in his freshman yearbook. He only appeared in this group picture with all the other freshman.

Circle the student that you think is my grandfather Lawrence E Houle. Explain your reasoning for the student you chose. Extra credit circle his twin sister Lucille.
