**Streamwood High School's** Fine Arts Department will present John Cariani's "Almost, Maine" at 7 p.m. on Thursday and Friday, Oct. 26-27 and at 11 a.m. on Saturday, Oct. 28, in the school's auditorium. The show is directed by Linnea Grooms.

Almost, Maine is a place that's so far north, it's almost not in the United States. It's almost in Canada. And it's not quite a town because its residents never got around to getting organized. So it almost doesn't exist. One cold, clear, winter night, as the Northern Lights hover in the star-filled sky above, the residents of Almost, Maine, find themselves falling in and out of love in unexpected and hilarious ways. Knees are bruised. Hearts are broken. But the bruises heal, and the hearts mend - almost- in this delightful midwinter night's dream.

At its core, "Almost, Maine" is nine separate stories with no more than three actors on stage at a time dealing with love and loss. The audience sits on stage with the actors and become part of the

magic.

Behind the scenes is a tech crew of 10 students, under the direction of auditorium manager and technical director Emmalie Hall. The crew is designing and constructing the set, designing and controlling the lighting, organizing all of the props, and handling all of the sound engineering. Costumes are being designed by Ashley Santiago.

Victoria L., a junior playing Pete and Deena, says, "I feel like one of the best parts of 'Almost, Maine' is the close relationship between everyone; it makes for genuine reactions, sincere connections, hilarious jokes, and makes the experience all the more enjoyable to watch."

Keira H., a senior playing Marci, says, "Being a part of 'Almost, Maine' has been one of the most memorable experiences I have had over the past few years. The rapport that we castmates has grown stronger the more time passes, and I couldn't be more grateful for them. I also really appreciate our director and tech director, as they were super supportive of me and everyone else. When I graduate later in the school year, I will be proud to have been a part of 'Almost, Maine' and the Sabre Ensemble Theater."

Tickets for these performances will be \$7 dollars for students and \$8 for a general admission seat and available for purchase at the door with cash.

### **District U-46 and transportation union reps hope more lucrative contract will end school bus driver shortage**

**By: Mike Danahey**

**Oct 20, 2023**

**School District U-46's** contract with its transportation union doesn't expire until June 2025, but negotiations will be starting early in effort to draft a deal that might be more attractive to bus driver applicants, officials said.

Drivers are working under a contract signed in April 2021 but both sides agreed in September that collective bargaining for a new package would begin this year, district spokeswoman Tara Burghart said.

"This would be an earlier start to contract negotiations than in the past," she said.

Bus drivers speaking at recent school board meetings have said they are being paid less than drivers in other districts, a situation that's contributing to a driver shortage and resulting in drivers being overworked.

Starting U-46 bus driver pay is \$19.50 an hour, significantly less than the \$22.68 paid by St. Charles School District 303 and the \$25 rate at Palatine School District 15, union officials said.

"It's been at least two years that we have been struggling with transportation," said Heather Weiss, president of the District U45 Transportation Union.

The district employs 265 school bus drivers and has about a dozen drivers on call on an as-needed basis, Burghart said. That's 11 fewer driver than they had last year.

Of the 48 job openings in the transportation department, 34 are for bus drivers, Burghart said. Because of the shortage, some students are arriving late to school, which impacts instruction time, Weiss said.

"Our special education students need consistency, and that is definitely taking a hit with the shortage because we have to double up routes. This causes drivers to be overloaded and students to be late to school and even home," Weiss said.

Burghart acknowledged this has been a problem.

"We do have routes that run late to school because of the driver shortage, which is why we are working hard to bring more qualified drivers and assistants onto our team," she said.

Since the COVID-19 pandemic, U-46 and many other school districts have not been able to hire enough drivers, Burghart said. The district has been holding job fairs, offering referral bonuses and using other recruitment efforts to close the gap, she said.

“We are working diligently to resolve the staffing challenges that school districts across the state are facing so that our transportation services run smoothly and (we) work closely with our schools to ensure that our routes are not overloaded,” Burghart said.

Weiss said the union has been told that U-46 officials recognize the need to offer more competitive wages.

“Our school bus drivers and assistants play a vital role in our school district, ensuring that more than 22,000 students travel safely between their schools and homes each day. We appreciate their dedication and service,” Burghart said. “We are committed to finding a resolution that recognizes their valuable contributions to our school community.”

### **Few suburban schools follow state's radon testing recommendation**

**By: Jake Griffin**  
**10-21-2023**

Despite recommendations that schools be tested for radon every five years, 85 out of 100 suburban school districts have not done so -- and more than half of the 15 that did found elevated levels of the radioactive gas in at least one building.

Even among districts that tested, most did not test all their buildings as recommended.

That's according to a Daily Herald investigation into the 100 districts' compliance with an Illinois State Board of Education recommendation that school buildings be tested every five years for the gas that the U.S. Environmental Protection Agency and U.S. Surgeon General's office estimate is responsible for more than 21,000 lung cancer deaths annually.

"I wouldn't be surprised if this is the first time some of these school districts are hearing the word 'radon,'" said Patrick Daniels, a health physicist and radon program manager for the Illinois Emergency Management Agency. "Radon is a very big risk most people aren't aware of, or don't understand."

The radon testing recommendation was part of a 2009 legislative package that also "requires" school districts to report test results to IEMA, though compliance with this aspect of the law appears scattershot as well.

"Our district wanted to be proactive and comply with some of the new recommendations that have been coming out so we could be ahead of the curve if it became required," said Scott Ney, director of facility operations at Geneva Unit District 304.

Six of the district's 11 buildings were tested in 2021, costing the district \$12,200, according to records obtained through a public records request. The other buildings are slated to be tested soon, Ney said.

Of the 417 detectors deployed in those six buildings, five showed radon levels above 4 picocuries per liter of air, the accepted limit. Another \$6,914 was spent to remediate the problems.

"Mitigation costs can vary depending on the location of the leak in the building," said Dan Potter, who operates DuPage Radon Contractors and also runs the Illinois Radon Policy Task Force. "But these radon mitigation systems are pretty dependable, and once they're installed, they work."

Millburn Elementary District 24 officials in Lake County just installed a system a few weeks ago after elevated levels were discovered in an elementary school. Testing and remediation costs

combined were \$11,345, records show.

"We wanted to make sure everyone's safe, that's our priority," said District 24 Superintendent Jason Lind.

Some of the largest suburban school districts -- including Elgin Area **District U-46**, Indian Prairie Unit District 204, Northwest Suburban High School District 214 and Wheaton Warrenville Unit District 200 -- have not done any testing, records show. Officials from some of those districts noted the state is only recommending the action, not requiring it. District 200 officials said testing hasn't taken place at any of its 20-plus buildings because "our schools do not have basements."

"It doesn't have to be a basement, it's anything with ground contact," said Kirsten Schmidt, vice president of Westmont-based Radon Detection Specialists. "We find high levels in rooms on slabs all the time."

The state law reads that districts should test in "every occupied school building."

Since the 2017-2018 school year, Elk Grove Elementary District 59, Leyden High School District 212, Northbrook Elementary District 27 and Northbrook Elementary District 28 in suburban Cook County reported test results. Elevated levels were detected in a classroom in District 28.

In DuPage County, Downers Grove Elementary District 58, Glen Ellyn Elementary District 89 and Naperville Unit District 203 reported testing in just some of those districts' buildings. Elevated levels were found in two classrooms at one of the four schools tested in District 58 and one classroom in District 203 also reported unsafe levels, reports show.

In addition to District 304, East Aurora Unit District 131 was the only other school district in Kane County to perform tests in the past five years. St. Charles Unit District 303 performed tests six years ago and Kaneland Unit District 302 tested in 2013.

District 131's testing in 2018 was one of the most comprehensive in the suburbs. In all, 1,603 detectors were deployed at 25 district buildings resulting in 36 unsafe readings at eight different schools. The cost to the district for both testing and remediation was \$35,600, district records show.

In McHenry County, Huntley Unit District 158 tested nine schools in 2022. Only one of the 90 detectors deployed recorded unsafe radon levels.

Barrington Unit District 220, Fremont Elementary District 79, Lake Zurich Unit District 95 and

Woodland Elementary District 50 were the only Lake County school districts beside District 24 to report radon testing in the past five years. All but District 50 reported some detectors with elevated radon levels. Both District 220 and District 95 officials reported spending nearly \$60,000 each to test and remediate leaks.

District 79 officials took advantage of a state program that trains staff on how to use radon detectors, and performed the testing with state-issued equipment, saving thousands of dollars.

Schmidt said the tests are small, well-marked unobtrusive devices placed in classrooms and other spots where people congregate.

"It's not uncommon to find elevated levels, but I've never had a case where we've had to shut down a room or anything," she said. "It's really about prolonged exposure, so how long is too long to go without testing? It's always fixable."

Radon exposure is more likely to affect teachers more so than students, Schmidt said. That's because teachers and other district staff are apt to remain in the same room year after year.

Teacher unions back the ISBE recommendation.

"The Illinois Federation of Teachers supports efforts to ensure our schools are safe and healthy for all students, teachers and staff," said IFT President Dan Montgomery. "To that end, we urge districts to conduct any ISBE-recommended testing, such as radon testing, that impacts the health and safety of our members and the students they serve."

Potter's task force is looking to draft legislation that would change radon testing from a recommendation to a requirement. The group formed less than two year ago and was already successful in passing legislation requiring landlords to test for radon in rental units, which goes into effect next year.

"We've known that radon kills for 30 years now," Potter said. "We're trying to get a mandate for school testing."

When **Elgin** played **South Elgin** during the regular season, the Maroons were without their leading scorer, Eduardo Nava.

With Nava in the lineup on late Saturday afternoon at the Class 3A **Elgin** regional final, his talent was on full display. He needed less than two minutes to respond to **South Elgin's** early strike from Ashton Kerrigan. **Elgin** won 4-1.

He scored another on a 24-yard free kick and another while gaining possession deep the box before tapping it home to finish with a hat trick.

"He's a difference-maker that allows the other guys to play at a high level," Maroons coach Jimmy Romano said. "I was very happy with how the guys responded, especially after giving up the first goal. We didn't put our heads down and at halftime we knew what we needed to do in the second half."

Freshman Alex Vallarruel also scored for **Elgin**.

Huntley 1, Dundee-Crown 0:

The Red Raiders handled the Chargers 4-1 earlier this month but found themselves scoreless after 80 minutes of regulation and a pair of overtimes during Friday's Class 3A Huntley regional championship.

Despite Hudson Nielsen missing his attempt for Huntley, Jack Bakey followed with the first of what would prove to be three consecutive saves during the shootout, while Finley Williams, Gavin Eagan and Kyle Paler were good on their tries to lead the Red Raiders past their familiar FVC foe.

Glenbard West 1, Geneva 0:

PK shootouts appeared to be a theme of sorts across the IHSA regional finals on Friday with a handful of games needing the special session to claim a winner.

The Hilltoppers got a pair of huge saves from their goalkeeper, Jack Harrod, and edged the Vikings 4-3 in the shootout to win the Class 3A Geneva regional title, the program's first since 2014.

"Playing for 100 minutes, there's a lot going through my mind," Hilltoppers coach Phil Wycik said.

"One mis-hit and my team is down and then 18 seniors are done. That's the love of the game and the hate of the game and at the end of the day either we were moving on or they were moving on."

Hinsdale Central, 3, Mt. Carmel 1:

Trailing 1-0 at the half, the Red Devils rallied to victory during Friday's Class 3A Hinsdale Central regional championship.

"Proud of the boys," Hinsdale Central coach Mike Wiggins said. "I wish every youth player who grows up playing this great game could experience what our fans at this great school created tonight in an amazing comeback."

Luca Davies added to his record-breaking season with his 26th goal this fall.

"Luca did what we knew he could do, as he has all season and got us back in it with such a big goal to even the score," Wiggins said. "What's amazing is less about the number of goals, but the significance of so many of them."

Ardit Abdullai scored the go-ahead goal and Robbie Rocque added insurance.

St. Charles East 2, Conant 1:

Senior brothers Marc Walker and Jake Walker provided the assists on goals from Aiden Maloney and Garrett Melton and the Saints rallied past Conant in Friday's Class 3A Glenbard North regional title game.

Timothy Christian 3, Wheaton Academy 1:

The Trojans, who edged the Warriors in a PK shootout to take third in the state in 1A last season, once again got the better of them this postseason to win the Class 2A Wheaton Academy regional late Saturday night.

Crystal Lake South 1, Lake Forest 0:

Nolan Getzinger's second-half goal lifted the Gators to their sixth straight regional title during Saturday's Class 2A Crystal Lake South regional championship

**Streamwood 6, Grant 0:**

The Sabres got a pair of goals from Luis Vega and others from A.J. Sabanovic, Merced Availa, Andy Benitez and Jose Pena as they cruised to victory in Friday afternoon's Class 3A Streamwood regional final.

York 3, Glenbard East 2:

With hopes of advancing to state again fading with the scoreboard reaching single digits in minutes remaining and the Dukes trailing 2-0, things did not look good for York during Friday's Class 3A Schaumburg regional. A pair of late goals in the final eight minutes of regulation turned the game completely around. The Dukes pushed the game into overtimes before winning in a shootout.

West Chicago 2, St. Charles North 1:

The Wildcats surrendered a goal just two minutes into the action of Friday's Class 3A Addison Trail regional final, but rallied behind a brotherly effort. The Wildcats started three sets of brothers, which included seniors Rafael Posada and Aldo Alfaro and who each scored. Alfaro had the first assist while Posada's younger brother, Leonardo, assisted Alfaro. In addition, Alfaro's younger brother, Alan Alfaro, was a key part of a defense that shut down the North Stars for the final 78 minutes.

Other 3A area regional championship game scores included, Naperville Central 4, Bolingbrook 1; Naperville North 2, Plainfield East 0; Romeoville 4, Metea Valley 3, 2 OT; Oswego 2, West Aurora 1, 2 OT; Lyons 5 Downers Grove North 1; and Round Lake 2, Larkin 0. In 2A, scores included, Benet 3, Nazareth 0; Belvidere North 1, Burlington Central 0; and Rockford Boylan 5, Kaneland 0. y, Westminster Christian, the area's last remaining 1A team, watched its season come to an end after a 3-1 loss to Richmond-Burton in Saturday's Oregon sectional semifinal.

### **West Chicago becomes eligible for playoffs with victory against Larkin**

**By: Allen Oshinski**

**10/20/ 2023**

West Chicago's two-decade playoff drought most likely ended Friday night.

Behind 5 touchdowns by Vincent Muci and a gritty defense, the Wildcats won their fifth game by beating Larkin 35-19 in Upstate Eight Conference action in West Chicago.

With 36 playoff points coming in, the Wildcats (5-4, 5-4), who haven't been to the postseason since 2002, figure to be in good shape when the pairings are announced Saturday night.

West Chicago broke the game open with 3 fourth-quarter touchdowns.

Leading 28-19 after Erick Myrick's 96-yard kickoff kept **Larkin** close, the Wildcats got the ball with just over nine minutes left. In a drive that epitomized their season, the Wildcats moved 65 yards in 13 plays, all on the ground, burning all but 1:17 of the clock. All but 1, including the last 9, were runs by Muci. On third and goal from the 17, on his 42nd carry of the night, the senior tailback broke three tackles to go in for the clinching score.

Muci also scored on runs of 5, 2, and 3 yards and took a blocked punt to the end zone to open the scoring. He finished with 183 yards.

Before that last drive, Muci had just one thought: "Carry the rock. We've got to score. If we get it right here, we end it, it's over."

Fans ran onto the field and celebrated with the players after the final buzzer.

"It's just amazing," Muci said. "Just having this opportunity after coming from a losing program, just turning it up these last few years, it's been great."

The turnaround from last year's 1-8 record started with some soul-searching among coaches last November.

"After what we went through last year we sat together as coaches and said, 'What do we need to change?,'" said West Chicago coach Adam Chavez. "We said, we're not going to win by beating anybody with athleticism, with speed. We're going to beat people with toughness and physicality. That started in the weight room, getting the kids in the weight room. Doing whatever we can, just getting that mentality of being tough and being physical. It started after Thanksgiving of last year."

The Wildcats got an early lift from their special teams, blocking a **Larkin** punt on the game's first possession. Muci scooped in and returned it for the score. After a defensive stop, Muci put West Chicago up 14-0 with his first rushing touchdown.

But the Royals battled back with touchdowns by Jalen Miller on runs of 14 and 1 yards. The Wildcats blocked the second extra point to lead 14-13 and that was the difference in the game until the fourth quarter.

Muci and the Wildcats scored twice in less than two minutes thanks to an interception by Tommy Doyle that he returned to the 3-yard line, setting up a 1-play scoring drive.

Myrick took the ensuing kickoff all the way to keep things interesting, setting up the Wildcats' final drive.
