## Grade 6 Grade-Level Goals

## Content Strand: Number and Numeration

| Grade-Level Goals | Content Thread | Program Goal |  |
| :--- | :--- | :--- | :--- |
| Goal 1 | Read and write whole numbers and decimals; identify <br> places in such numbers and the values of the digits in <br> those places; use expanded notation, number-and-word <br> notation, exponential notation, and scientific notation <br> to represent whole numbers and decimals. | Place value and notation | Understand the Meanings, Uses, <br> and Representations of Numbers |
| Goal 2 | Solve problems involving percents and discounts; <br> explain strategies used; identify the unit whole in <br> situations involving fractions, decimals, and percents. | Meanings and uses of <br> fractions |  |
| Goal 3 | Use GCFs, LCMs, and divisibility rules to manipulate <br> fractions. | Number theory |  |
| Goal 4 | Apply the order of operations to numerical expressions <br> to give equivalent names for rational numbers. | Equivalent names for <br> whole numbers | Understand Equivalent Names for <br> Numbers |
| Goal 5 | Find equivalent fractions and fractions in simplest form <br> by applying multiplication and division rules and <br> concepts from number theory; convert between <br> fractions, mixed numbers, decimals, and percents. | Equivalent names for <br> fractions, decimals, and <br> percents |  |
| Goal 6 | Choose and apply strategies for comparing and <br> ordering rational numbers; explain those choices and <br> strategies. | Comparing and ordering <br> numbers | Understand Common Numerical <br> Relations |
|  |  |  |  |

## Grade 6 Grade-Level Goals

## Content Strand: Operations and Computation

| Grade-Level Goals |  | Content Thread | Program Goal |
| :---: | :---: | :---: | :---: |
| Goal 1 | Use mental arithmetic, paper-and-pencil algorithms, and calculators to solve problems involving the addition and subtraction of whole numbers, decimals, and signed numbers; describe the strategies used and explain how they work. | Addition and subtraction procedures | Computes Accurately |
| Goal 2 | Use mental arithmetic, paper-and-pencil algorithms, and calculators to solve problems involving the multiplication and division of whole numbers, decimals, and signed numbers; describe the strategies used and explain how they work. | Multiplication and division procedures |  |
| Goal 3 | Use mental arithmetic, paper-and-pencil algorithms, and calculators to solve problems involving the addition and subtraction of fractions and mixed numbers; describe the strategies used and explain how they work. | Procedures for addition and subtraction of fractions |  |
| Goal 4 | Use mental arithmetic, paper-and-pencil algorithms, and calculators to solve problems involving the multiplication and division of fractions and mixed numbers; describe the strategies used and explain how they work. | Procedures for multiplication and division of fractions |  |
| Goal 5 | Make reasonable estimates for whole number, decimal, fraction, and mixed number addition, subtraction, multiplication, and division problems; explain how the estimates were obtained. | Computational estimation | Make Reasonable Estimates |
| Goal 6 | Use ratios and scaling to model size changes and to solve sizechange problems; represent ratios as fractions, percents, and decimals, and using a colon; model and solve problems involving part-to-whole and part-to-part ratios; model rate and ratio number stories with proportions; use and explain cross multiplication and other strategies to solve proportions. | Models for the operations | Understand Meanings of Operations |

## Content Strand: Data and Chance

| Grade-Level Goals | Content Thread | Program Goal |  |
| :--- | :--- | :--- | :--- |
| Goal 1 | Collect and organize data or use given data to create <br> bar, line, circle, and stem-and-leaf graphs with <br> reasonable titles, labels, keys, and intervals. | Data collection and <br> representation | Select and Create Appropriate <br> Graphical Representations of <br> Collected or Given Data |
| Goal 2 | Use the minimum, range, median, mode, and mean and <br> graphs to ask and answer questions, draw conclusions, <br> and make predictions; compare and contrast the median <br> and mean of a data set. | Data analysis | Analyze and Interpret Data |
| Goal 3 | Use the Multiplication Counting Principle, tree <br> diagrams, and other counting strategies to identify all <br> possible outcomes for a situation; predict results of <br> experiments, test the predictions using manipulatives, <br> and summarize the findings; compare predictions based <br> theoretical probability with experimental results; <br> calculate probabilities and express them as fractions, <br> decimals, and percents; explain how sample size affects <br> results; use the results to predict future events. | Quantitative probability | Understand and Apply Basic <br> Concepts of Probability |

## Everyday Mathematics

## Grade 6 Grade-Level Goals

| Content Strand: Measurement and Reference Frames |  |  |  |
| :--- | :--- | :--- | :--- |
| Grade-Level Goals | Content Thread | Program Goal |  |
| Goal 1 | Estimate length with and without tools; measure length <br> with tools to the nearest 1/16 inch and millimeter; <br> estimate the measure of angles with and without tools; <br> use tools to draw angles with given measures. | Length, weight, and <br> angles | Understand the Systems and <br> Processes of Measurement; Use <br> Appropriate Techniques, Tools, <br> Units, and Formulas in Making <br> Measurements |
| Goal 2 | Choose and use appropriate formulas to calculate the <br> circumference of circles and to solve area, perimeter, <br> and volume problems. | Area, perimeter, volume, <br> and capacity |  |
| Goal 3 | Use ordered pairs of numbers to name, locate, and plot <br> points in all four quadrants of a coordinate grid. | Coordinate systems | Use and Understand Reference <br> Frames |

## Grade 6 Grade-Level Goals

| Content Strand: Geometry | Content Thread | Program Goal |  |
| :--- | :--- | :--- | :--- |
| Grade-Level Goals | Ldentify, describe, classify, name and draw angles; | Lines and angles | Investigate Characteristics and <br> Properties of Two and Three- <br> Dimensional Geometric Shapes |
| Goal 1 | Ideter <br> determine angle measures by applying properties of <br> orientations of angles and of sums of angle measures in <br> triangles and quadrangles. |  |  |
| Goal 2 | Identify and describe similar and congruent figures and <br> describe their properties; construct a figure that is <br> congruent to another figure using a compass and <br> straightedge. | Plane and solid figures |  |
| Goal 3 | Identify, describe, and sketch (including plotting on the <br> coordinate plane) instances of reflections, translations, <br> and rotations. | Transformations and <br> symmetry | Apply Transformations and <br> Symmetry in Geometric <br> Situations |

## Content Strand: Patterns, Functions, and Algebra

| Grade-Level Goals | Content Thread | Program Goal |  |
| :--- | :--- | :--- | :--- |
| Goal 1 | Extend, describe, and create numeric patterns; describe <br> rules for patterns and use them to solve problems; <br> represent patterns and rules using algebraic notation; <br> represent functions using words, algebraic notation, <br> tables, and graphs; translate from one representation to <br> another and use representations to solve problems <br> involving functions. | Patterns and functions | Understand Patterns and <br> Functions |
| Goal 2 | Determine whether equalities and inequalities are true <br> or false; solve open number sentences and explain the <br> solutions; use a pan-balance model to solve linear <br> equations in one or two unknowns; use trial-and-error <br> and equivalent equation strategies to solve linear <br> equations in one unknown. | Algebraic notation and <br> solving number sentences | Use Algebraic Notation to <br> Represent and Analyze Situations <br> and Structures |
| Goal 3 | Describe and apply the conventional order of <br> operations. | Order of operations |  |
| Goal 4Describe and apply properties of arithmetic and <br> multiplicative and additive inverses. | Properties of the <br> arithmetic operations |  |  |
